

# Argus Africa Base Oils and Lubricants

12-13 May 2015  
Hilton Nairobi  
Kenya

## A key meeting place for the base oils, lubricants and additives companies in Africa

Bringing together base oil producers, lubricants blenders, additive companies and traders as well as shipping and logistics companies, the **Argus Africa Base Oils and Lubricants conference** will provide market trends and industry insight on developments in the African continent.

An agenda developed in collaboration with industry participants will focus on market updates and regional profiles as well as offering insight into growth potential around the continent. Delegates will hear how different regions compare in a global market and how demand will grow in Africa as availability of group one base oils shift and economic growth will affect demand.

- 

### Key topics to be explored:

- Understanding the African base oils and lubricants market in the global context
- Country profiles: Examining the largest and most rapidly growing lubricants markets
- Tackling substandard finished lubricants, counterfeit product and other industry malpractice
- Supply chain efficiencies – shipping and storage capacities, handling and distribution
- Assessing the impact of tax regimes in different regions of the continent
- In fast growing economies will there be a significant market shift to premium grade base oils?
- How will demand evolve from different market segments? Which applications of lubricants will see the most growth?
